

Low Power Factor is a big concern for any industry and many industries face penalties for low pf. We provide power quality spares as per your requirement.

LV Heavy Duty Capacitor: **Rating:** 5 to 50 kVAR
Voltage: 230 to 1200 V
Mounting Type: Surface Mount
Application: PF improvement
/Tuned /Detuned harmonic filter

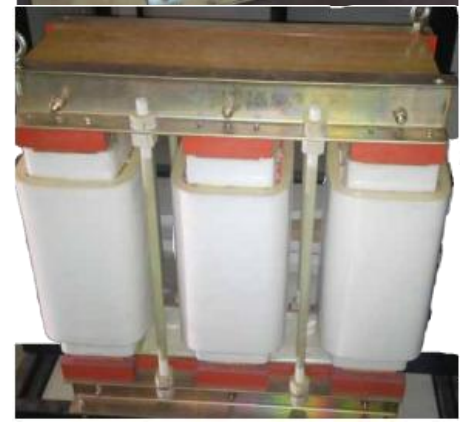

MV Heavy Duty Capacitor: **Rating:** 50 to 300 kVAR
Voltage: 3.3 to 12 kV
Mounting Type: Surface Mount
Application: PF improvement
/Tuned/Detuned harmonic filter

LV Reactor: **Rating:** 12.5 to 150 kVAR
Voltage: 400 to 1200 V
Application: Tuned/Detune harmonics filter
Specialty: Made of high-class transformer sheets and copper wire or aluminum band

HV Reactor: **Rating:** 75 to 200/ kVAR
Voltage: 3.3 to 12 kV
Application: Tuned/Detuned harmonic filter
